

Release Notes

Cadac Organice Document Control System (DCS)

Date 18 February 2019

Version v1.0.0.3508

1 Introduction

This document contains the release notes for the Cadac Organice DCS (v1.0.0.3508). The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation.

The Cadac Organice DCS release notes provide an overview of the solved issues, modified features and added features. This overview may not be complete, i.e. there might be other unlisted items that have been solved, modified or added, but these are more technical items without direct commercial/functional value. Please check the chapter about Recent Changes to see if this update is applicable for you.

Organice DCS is primary build for use on a desktop. Usage on mobile devices is not supported.

4 Recent Changes – 3508

Item	Description
12045	Improved performance for large environments. These enhancements have impact on <ul style="list-style-type: none">▪ Maintenance▪ Security▪ Reporting▪ Report datasource
6094	Changed the DCS Site setting called "Enforce unique names for controlled documents" to be compatible with bulk documents. If this setting is checked DCS will return an error message when a user tries to add/create a controlled document with a name which is already in use somewhere on the site. This setting also has effect in other places of DCS where controlled documents are created. DCS will prohibit the creation if the resulting names are not unique. Those places are amongst others: <ul style="list-style-type: none">• The Copy Document button on the ribbon• The Create Revision button on the ribbon• The Copy Item workflow activity

5 Solved bugs

Item	Description
12146	Fixed the retrieval of the master consolidation file by restricting the search to the controlled document and allowing the ID's of the controlled files.
12147	Fixed the reschedule of the system push jobs by forcing the push and preventing the reschedule when called by a job.
