Release Notes

Cadac Organice Document Control System (DCS)

Date   16 December 2019

Version v1.0.0.3530

Create, manage & share digital design information.

Cadac Group

1 Introduction

This document contains the release notes for the Cadac Organice DCS (v1.0.0.3530). The following sections describe the release in detail and provide late-breaking or other information that supplements the main documentation.
The Cadac Organice DCS release notes provide an overview of the solved issues, modified features and added features. This overview may not be complete, i.e. there might be other unlisted items that have been solved, modified or added, but these are more technical items without direct commercial/functional value. Please check the chapter about Recent Changes to see if this update is applicable for you.

Organice DCS is primary build for use on a desktop. Usage on mobile devices is not supported.

3 What's New

Item	Description
31804	Extended the server performance information.
31917	Ensured a correct role membership resolving in Workbox workflows after team renaming. Only available in SP2013 and SP2016.
31919	Built functionality to hide certain actions in running workflows.
31926	Implemented an advanced setting to manipulate the common workflow actions of the selected items, e.g. re-order, and remove.
31927	Implemented advanced setting to make it possible to make a previous revision the current one. The naming of new revisions will not give any conflicts by continuing the numbering using the last created revision.
31933	Implemented an advanced setting to enable a pre-process when creating new revisions.

4 Recent Changes – 3530

Item	Description

5 Solved bugs

Item	Description
31891	Error repaired in setting 'Use Team Filter in distribution lists'. This setting can be set on a controlled document content type.
	Repaired incorrect completion of tasks during user synchronization of distribution lists.

6 Known Issues
