Release Notes

Cadac Organice Document Control System (DCS)

Date 12 March 2021

Version v1.0.0.3548

Cadac Group

1 Introduction

This document contains the release notes for the Cadac Organice DCS (v1.0.0.3548). The following sections describe the release in detail and provide late breaking or other information that supplements the main documentation.

The Cadac Organice DCS release notes provide an overview of the solved issues, modified features and added features. This overview may not be complete, i.e., there might be other unlisted items that have been solved, modified, or added, but these are more technical items without direct commercial/functional value. Please check the chapter about Recent Changes to see if this update is applicable for you.

Organice DCS is primary build for use on a desktop. Usage on mobile devices is not supported.

2 Installation

Manifest
- Release Notes (this file).
- Installation executable
    - Organice DCS Installer for SharePoint 2010.exe
    - Organice DCS Installer for SharePoint 2013.exe

  Only to use in combination with Blazon version 16.0 for SharePoint 2013 and SharePoint 2016, supported for IE9, IE10 and IE11.

Brava HTML viewing (default):
- Brava Viewer 16.0.0 for SharePoint 2013 and SharePoint 2016 with Brava! SharePoint Integration version 16.0.1.41, supported for IE9, IE10 and IE11, Microsoft Edge and Google Chrome.
  Only to use in combination with Blazon version 16.0 for SharePoint 2013 and SharePoint 2016, supported for IE9, IE10 and IE11, Microsoft Edge and Google Chrome.

Domain Group resolving:
- With the new implementation of the Domain Group resolving, it is mandatory to have a root site in a DCS enabled web application.

Working:
- A hidden library with the name DCS_DomainGroups is created, and all permissions are removed.
- For each domain group found in the DCS database a folder with md5 hash of the upper name and the title of the domain group is created and only that domain group is given the read permission.
- The code used in the `/_layouts/15/chkperm.aspx?obj=<Library.ID>,DOCLIB&IsDlg=1` is used to check if a user has permissions on those folders that can only be related to the domain group that have the read permission.
